More Than Software

Services To Help You Succeed

4/23/2026

StratusLIVE

Speakers

Brett Meyer
Vice President of Professional Services

Agenda

- New Ways to Support You
- Why We Built This Portfolio – The Problem We're Solving
- Platform Optimization – Getting Your CRM Back to Its Best
- Business Process Optimization – Fixing The Human Side
- AI Adoption – Practical AI, Responsibly Deployed
- CSR Shared Services, Analytics & Digital Fundraising
- CRM Training & Education
- The Client Journey – How It All Fits Together

New Ways to Support You

Alicia Stevens
Director of Customer Success

Your day-to-day partner for:

- Ongoing success
- Staying ahead of issues
- Making sure your voice is heard

Brett Meyer
Director of Customer Success

Your resource for:

- Package services
- Support
- Data solutions

Brendan Murphy
Director of Enterprise Customer Accounts

Your guide for:

- Contract renewals
- Expanding your partnership
- Strategic conversations

The Challenge

The gap between what your platform can do and what you actually use

Configuration Drift

Platforms drift over time as staff turns over and processes evolve informally. What made sense at implementation no longer reflects how you work.

Data Without Insight

Data accumulates in your CRM and Online System but doesn't become actionable information for leadership, gift officers, or campaign teams.

Tribal Knowledge

Operational procedures that were once clear become tribal knowledge held by one or two people, and leave with them.

AI Uncertainty

AI tools are increasing capacity, but adoption without a privacy framework creates risks organizations aren't equipped to manage alone.

Our Unique Position

We understand both sides of the equation.

*"We are not a generic consulting firm learning your software. **We built it.** That means our assessments are grounded in how the platform is designed to work, and our recommendations reflect what the best-configured environments in our client base look like."*

Evidence Over Opinion

Every finding is tied to a specific configuration, record count, or usage metric, not consulting judgment.

Deliverables That Get Used

Reports structured for decisions. Procedures written for staff. Dashboards built for the leader who reads them.

A Clear Path Forward

Every engagement ends with a defined next step, not a dependency on us for every change.

Framework – The Client Journey

Every offering can stand alone, but the greatest impact comes from deliberate sequencing.

01
Establish the Foundation

Start with an assessment. Get a clear, evidence-based picture of where you stand and what to prioritize.

02
Optimize the Core

Address the highest-impact gaps. Re-implement drifted areas, redesign broken processes, stand up analytics, deploy first AI workflows.

03
Sustain & Extend

Build internal capability. Trained staff. Documented procedures. Self-service analytics. A self-sustaining AI practice.

Service 1 - Platform Optimization

Assess and restore your StratusLIVE 365 CRM or Online capabilities to peak performance. For long-tenured clients especially, configuration drift creates downstream problems in data quality, reporting accuracy, and staff efficiency that no other investment can fully compensate for.

Three Tiers – Built to Progress

TIER	OFFERING	BEST FOR
T1	**365 Health Check** Targeted 1-Area assessment in 2-3 weeks. Scored Findings report, prioritized issue log, executive readout.	Organizations with a specific concern. Entry-level, fast, low-friction.
T2	**Comprehensive Platform Review** Cross-functional diagnostic in 4-6 weeks. Maturity scorecard, remediation backlog, phased roadmap.	Organizations ready for a full picture of platform health across all functional areas.
T3	**Functional Area Re-Implementation** Fixed-scope rebuild sample areas: Moves Management, Campaign Architecture, Gift Processing, Data Remediation, Workflow, Model-Driven Apps.	Organizations with identified areas that have drifted significantly. Requires a Health Check or Review as prerequisite.

Service 2 – Business Process Optimization

Configuration drift almost always has a process breakdown underneath it. A well-configured platform on broken processes will underperform. A well-designed process unsupported by the platform will erode. We address both sides and produce documentation that survives staff turnover.

From Rapid Diagnosis to Enterprise Transformation

Tier 1

Process Rapid Assessment

2-3 weeks fast evaluation of the highest-impact breakdowns. Covers areas like; Gift Entry, data management, fundraising workflow adherence, acknowledgement operations and more.

Delivers: Stoplight process health report, prioritized issue log distinguishing process vs. configuration vs. training gaps, root cause analysis, recommended action plan.

Tier 2

Functional Process Redesign

4-6 weeks per functional area. Documents current state, designs improved future state, produces staff-ready tools to sustain change.

Delivers: Documented states, staff-ready procedural manuals, RACI matrices (roles and responsibilities), Checklists and turnaround time standards, communication workflow specifications.

Tier 3

Enterprise Process Transformation

8-16 weeks. Organization-wide process redesign for clients undergoing major transitions, new CDO, restructuring, platform upgrade, or merger.

Delivers: Full swimlane process maps, future-state operating model, procedure documentation library, change management plan, board-ready executive summary.

Service 3 – AI Adoption & Enablement

Practical AI capability – deployed responsibly within a privacy framework your board, donors, and regulators can trust.

Framework – PII-Safe AI Architecture

For data that is stored – What can AI Tools Access

- Aggregated metrics (gift counts, retention rates, averages)
- Anonymized/pseudonymized records (identifiers stripped)
- Structured operational data (campaign codes, batch totals, workflow status)

For data that is stored – What AI Tools NEVER Touch

- Raw named constituent records
- Contact Information
- Identifiable giving histories
- Wealth screening data

Why this matters

This is not a limitation – it is ***our primary competitive differentiator*** in the nonprofit market. Boards, donors and regulators demand responsible data stewardship. Our AI practice is designed from the ground up to meet that standard - nothing leaves our data center and nothing gets stored or tracked in the AI models.

From Assessment to Center of Excellence

Tier 1

AI Readiness Assessment

Evaluates data readiness, process documentation maturity, staff AI literacy, tech environment, and governance readiness. Produces a sequenced adoption roadmap.

Tier 2

AI-Enabled Reporting & Insights

Four packages:

1. Development Performance Intelligence
2. Board Report Automation
3. Donor Segment Insights
4. Operational Anomaly Detection

All on clean, aggregated data.

Tier 3

AI-Enabled Process Automation

Custom workflow or agent examples:

1. Donor Acknowledgement Drafting
2. Contact Report Assistance
3. Prospect Research Synthesis
4. Grant & Case Statement Support

Tier 4

AI Center of Excellence

Governance Framework development, internal prompt library, staff capability program and 12-24-month technology roadmap. For organizations ready to own their AI practice

Services 4 & 5 – CSR Shared Services and Analytics

Ongoing managed support for Enterprise Give at Work customers and executive-ready data visibility for all parts of the organization

CSR SHARED SERVICES

Package 1 – Campaign Readiness

Full campaign season support – project planning, recipe configuration, up to 10 corporate partner sites, SSO setup, post-campaign debrief, and monthly training throughout the year.

Package 2 – Premium Corporate Partner

National-scale campaigns with advanced segmentation, custom registration, SFTP automation, payroll output configurations, and full site deployment.

Package 3 – Administrator Training

Customized hands-on training tailored to your actual site configuration, not generic walkthrough. Includes sandbox practice and onboarding-ready post-training resources.

Package 4 – Mini A La Carte Services

Fixed-Price task packages: SFTP Configuration, SSO Setup, Give at Work Recipe Setup, Security Questionnaire Completion, Group Training Sessions, and more....

ANALYTICS & EXECUTIVE REPORTING

Starter Dashboards (Power BI)

Pre-Built Dashboards for donor retention, campaign performance, gift processing and major gift portfolio status, built directly on your StratusLIVE data.

Executive & Board Reporting Suite

Board-ready narrative visualizations, goal vs. actuals tracking, and year-over-year analysis. Ready to hand to a CDO or CFO without cleanup.

Development Performance Analytics

Gift officer scorecards, portfolio penetration analysis, solicitation pipeline reporting, and moves management velocity metrics.

Data Warehouse (Snowflake/Fabric)

Enterprise grade BI infrastructure for organizations ready to build a semantic layer and support self-service analytics organization-wide.

Services 6 & 7 – Digital Fundraising & CRM Training

Accelerate your digital fundraising channels, and ensure your staff can use the platform as it's designed to work.

IGNITE DIGITAL FUNDRAISING

Donation Page Optimization

Conversion audit, A/B testing setup, mobile review, gift array optimization, and updated configurations

Peer-to-Peer & Event Fundraising Setup

Configuration, templating, and coaching for first P2P or event launches. Includes campaign brief and participant communication playbook.

Workplace Campaign Configuration

Setup and training package for Ignite Give at Work across corporate campaigns.

Donor Hub Enterprise Deployment

Configuration, branding, content strategy, and staff enablement for Enterprise clients extending into the Donor Hub channel.

CRM TRAINING AND EDUCATION

Program 1 – New User Training

Navigation, Constituents, Advanced Find

Program 2 – Resource Development Training

Navigation, Outlook integration, activity and constituent management, and opportunity management.

Program 3 – Finance & Processing

Envelope/Batch Management, pledge/payment processing, reconciliation management and financial reporting. For federated non-profits includes Payroll and Payout processing.

A La Carte Training Menu

Includes but not limited to: Personalize the UI, Platform Administration, Customizations, Workflows, Marketing and more.... Available individually or may be bundled with Platform Optimization projects.

The Big Picture

How the portfolio fits together

Start: Assess

- Platform Health Checks
- Process Rapid Assessment
- AI Readiness Assessment
- Comprehensive Platform Review

Build: Optimize

- Functional area re-implementations
- Functional Process Redesign
- AI-Enabled Reporting Packages
- Starter Dashboards & Analytics

Grow: Sustain

- CRM Training Programs
- AI Process Automation Suite
- AI Center of Excellence
- CSR Shared Services Subscription

Key Principle: A platform re-implementation is more durable when paired with documented procedures. An analytics package is more powerful when built with clean data. An AI workflow is more sustainable when the underlying process is documented. The offerings are stronger together, and that is by design.

Where To Go From Here

The right starting point is wherever you are

Platform feels like it is not working right?

Start with a ***Health Check*** or ***Comprehensive Platform Review***

Curious about AI but not sure if you're ready?

Start with ***AI Readiness Assessment***

Processes feel inconsistent or undocumented?

Start with a ***Process Rapid Assessment***

Campaign season feels stressful and reactive?

Start with ***CSR Campaign Readiness***

Leadership wants better data visibility?

Start with ***Starter Dashboards*** or ***Development Performance Analytics***

New staff who need to get productive fast?

Start with ***New User Trainings*** or ***Personalized Administrative Training***
