Agency Portal to Partnerships

Your agency experience, rebuilt for what’s next

StratusLIVE

Agenda

- From Agency Portal to Partnerships: Key Differences
- Demo of the New Experience
- What this Means for You
- What You Can Expect
- Questions

1

What is Partnerships in Ignite?

The Evolution of Agency Portal

Legacy Agency Portal

- Standalone system
- Separate SQL database per org
- Limited reporting – manual exports
- Dated interface; friction for agency staff and your team
- No real-time data access

→

Partnerships in Ignite

- Native Ignite experience – one less system to manage
- Centralized Snowflake Data Warehouse – real-time data
- Near real-time reporting with PDF/CSV export
- Modern, responsive UI consistent with Ignite
- Streamlined onboarding and user management

What’s in VI?

The legacy portal – but built on modern infrastructure

Agency Onboarding

Self-service multi-step onboarding for agency admins — no manual setup required

Bulk Invite Agencies

Admins can invite multiple partner agencies at once dramatically reducing admin time

Bulk Agency User Invitations

Agency admins invite their full team in one workflow

Designation Matching

Match local designations to IRS master org records — clean data from day one

Compliance Area

ACH payout eligibility, annual self-certification, and partner document tracking

Reports Hub

Distribution Payee, Donor Designation, and Where Raised — with PDF/CSV export

Benefits for Your Organization

Your Role as the Community Convener

You set the standards

Compliance, credentialing, and annual certification — on your terms, in your system

You see everything

Centralized data means you know what's happening across your entire agency network in real time

You tell the story

Aggregate outcomes and distribution data make your community impact case undeniable

Partnerships + CVC: Your Community Backbone

What You Have

- **Partnerships:** compliance, onboarding, and reporting inside Ignite
- CVC extends that into volunteerism — agency opportunities surface on your site and corporate partner sites

What That Makes You

- The org that credentialed every agency in your network
- The platform where donors give and volunteer
- The backbone connecting nonprofits, companies, and donors

What this Means for your United Way

Less Admin Work

- Bulk invite agencies and users – not one at a time
- Compliance records centralized — ACH payout eligibility, annual self-certification, and partner document tracking in one place
- PDF/CSV reports generated on demand

Stronger Relationships

- Agencies work within a modern interface that reflects your organization
- You control the experience agencies have – that IS your brand

4

What to Expect

Changes your Team will Feel First

Workflow changes that land closest to home

WHAT'S DIFFERENT

- Reports on demand – no waiting on batch exports for Distribution Payee, Donor Designation, and Where Raised Reports
- PDF/CSV export – formats available at report run time
- Compliance Tracking – central visibility to ACH payout eligibility and self-certification status
- Designation Matching – reconciling local designations to IRS records now happens within Ignite

HEAD'S UP

User accounts in the legacy portal do not auto-migrate – agencies must be re-invited through Partnerships

WHAT DOESN'T CHANGE

→ Report data – same source, better delivery

→ Your agency relationships and payout history

Our Approach – and How We'll Work Together

Our approach – and how we'll work with you

V1 FOCUS

- ☒ Feature parity with the current Agency Portal
- ☒ Modern onboarding for agency admins and users
- ☒ Bulk invitation workflows for orgs and users
- ☒ Full compliance area (ACH, self-certification)
- ☒ Three core report types with export

WHAT WE'RE STILL DEFINING

Timing for general availability – H2 2026

We will communicate a clear path forward as details are confirmed.

HOW TO ENGAGE

→ Ask about early access

→ Bring your current Agency Portal questions
